DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING

SESSION: SESSION: Jul-Dec [ ] / Jan-Jun [ ] 202_ -202_

MINOR [ ] / MAJOR [ ]- PROJECT-I [ ] / II [ ]

INITIATION FORM

GROUP:	
TITLE OF PROJECT:	
GROUP LEADER:	**PROJECT GUIDE:**
Member 1:	**Member 2:**
Member 3:	**Member 4:**

WHICH PARAMETERS PROJECT IS BASED ON (Mark Tick)		
1	Current Trends and Recent Advancement	
2	Society Needs and Solution to the Current Problem	
3	Improvement Over Any Existing Service	
4	New Idea or Innovation	
5	Product Development	
6	Research	

PROJECT CLASSIFICATION CONSIDERING FACTORS (Mark Tick)			
CLASSIFICATION		**FACTORS**	
Application		Environment	
Product		Safety	
Research		Ethics	
Review		Cost/Standard	

DESCRIPTION OF PROJECT

SIGNATURE OF GROUP MEMBERS			
	NAME	**ENROLMENT**	**SIGNATURE**
1			
2			
3			
4			

PROJECT APPROVAL	
GUIDE RECOMMENDATION FOR APPROVAL	**HOD APPROVAL**

DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING

SESSION: SESSION: Jul-Dec [ ] / Jan-Jun [ ] 202_ -202_

MINOR [ ] / MAJOR [ ]- PROJECT-I [ ] / II [ ]

MANAGEMENT AND DELIVERY TIMELINE

Stage	Task	Description (Activities involved)	Deliverables	Timeline (Start Week - End Week)	Student Signature	Supervisor Signature
Project Initiation	Topic Selection & Approval	Research potential project areas - Finalize project topic in consultation with supervisor - Get approval from department	Topic Selection & Approval	August (Week 1)		
	Project Planning	Define project scope, objectives, and deliverables - Develop a Work Breakdown Structure (WBS) - Create a preliminary project schedule	Project proposal document - WBS - Preliminary Gantt chart -	August (Week 2)		
System Development Life Cycle (SDLC)	Requirement Analysis	Gather and document system requirements (functional and non-functional) - Identify stakeholders and their needs	System Requirements Specification (SRS) document	August (Week 3)		
	Design	Design system architecture, user interface (UI) mockups, and database schema	System esign Document (SDD)	August (Week 4)		
	Development	Develop and implement the system based on design documents - Conduct unit testing	Source code - Unit test reports	September (Week1-Week3)		
	Testing & Integration	Conduct system testing (integration, system, and acceptance testing) - Fix bugs and defects	Test reports - Bug tracking reports	September (Week4)		
Project Completion	Deployment & Documentation	Deploy the project (if applicable) - Prepare user manuals and other documentation	Deployed system (if applicable) - User manuals	October (Week1-Week2)		
	Project Presentation & Demonstration	Prepare and present the project to a review committee - Demonstrate the system functionality	Presentation slides - Demonstration script	October (Week3-Week4)		
	Project Report Submission	Prepare a final project report documenting the entire project lifecycle	Final project report	November (Week1-Week2)		

Submission Guidelines

1. Ensure all deliverables are completed and submitted by the end of each respective week.
2. Keep regular communication with your supervisor for feedback and approvals.
3. Follow the specified formats and deadlines to avoid delays in project evaluation.

For any questions or clarifications, contact your supervisor or project coordinator promptly.

EVALUATION SHEET

PROJECT GUIDE:

Project Steps	Project Task	Deliverable Marks	Evaluation Criteria	MM	ObM	FSign
Project Initiation	Topic Selection & Approval	Topic Selection & Approval	Relevance, feasibility, alignment with guidelines	5		
Project Planning	Project Planning	Project Proposal, WBS, Preliminary Gantt Chart	Clarity of objectives, comprehensiveness of WBS, realism of timeline	5		
Requirements Analysis	Requirements Gathering	SRS	Completeness, clarity, traceability, consistency	5		
System Design	System Design	SDD	Adherence to requirements, efficiency, maintainability, usability	5		
Development	System Development	Source Code, Unit Test Reports	Code quality, adherence to design, test coverage	10		
Testing and Integration	System Testing	Test Reports, Bug Tracking Reports	Test case effectiveness, bug resolution, system performance	5		
Deployment	Deployment and Documentation	Deployed System, User Manuals	Successful deployment, user-friendliness of manuals	5		
Presentation and Demonstration	Final Presentation	Presentation Slides, Demonstration Script	Content clarity, delivery, Q&A handling, system demonstration	5		
Project Closure	Project Report	Final Project Report	Comprehensiveness, structure, analysis, conclusions, recommendations	5
